

TrueTypeUG V2.2

TrueTypeUG is an interactive add-on tool for Unigraphics. From text it creates high-quality UG geometry using TrueType-fonts, native Unigraphics-fonts and characters/symbols defined in Unigraphics part files.

Features

- Creates Unigraphics geometry from text as curves or solids in engraved/embossed style
- Places text onto multiple surfaces, guided along any curve
- Uses TrueType-fonts (Arial, Times New Roman...), native Unigraphics-fonts (blockfont, iso-1...) and characters/symbols defined in UG part files
- Offers powerful geometric options like tapering & blending
- Integrates fully into Unigraphics user interface

Requirements

- Unigraphics NX1, NX2 or NX3
- WindowsNT/2000/XP, HP-UX 11
- UG/Gateway, UG/Open API Execute

Testlicense

- A time-limited trial package is available from www.w-eng.de
